

The Premiere XDS PRO4-P can record live programs and delay the playback as scheduled.

The recorded programs will remain in the XDS receiver for a limited amount of time (see below).

Past the posted time, the old files will be deleted.

This is to insure the receiver has ample storage for future recordings.

These are global settings for all stations.

If you need to delay a program longer than posted, you should use an external recording device.

<b>Digital Rights Management List</b>
