Relay 1 fires :05-second local liners before network breaks (except at 29:30). Relay 0 fires local breaks. :10-second rejoin bumpers follow all breaks. Hard outs at 29:30 and 58:50. All other breaks float. \* The Live Read :60 at 16:00 may float to another position in the hour or it may be replaced by a recorded spot. In that case, the network break would then be :90-seconds.
